REPORT OF BOARD OF HEALTH.

The only contagious disease that has required the attention of the board of health during the year has been a few cases of the measles. Wherever the attention of the board of health has been called to the fact, a placard has been posted upon each house as the law requires, but it is probable that the disease may spread somewhat more.

This board has been called upon to send several samples of water to the State Laboratory for analysis, and we would urge all to whom there may be any question as to the purity of their water supply, to avail themselves of this privilege.

We would also call your attention to the new bill just passed by the Legislature, requiring the board of health to disinfect premises wherever consumption has existed, same as in other contagious diseases.

Respectfully submitted,

A. B. STONE,
WILFRED M. DAVIS,

REPORT OF THE SCHOOL BOARD.

The following annual report of the school board of Hancock for the year ending July 15, 1904, is respectfully submitted with such information as they consider important and of interest to the town; this is made to correspond with the report required to be sent to the superintendent of public instruction. There will be found appended to this report a statistical table with names of teachers and other items required to be reported.

We have reason to be gratified with the excellent success of so many of our schools during the past year. It is due to say that our

teachers have generally been faithful and have worked for the interest of their schools; any lack of success which any of them may have had has mostly been owing to their inability to keep good order. Under our present system of schools more is required of a teacher than in former times, for there is more to teach and more to do. In school one may rank high in scholarship and be acquainted with all the theories and best methods of instruction, and not be able to keep order, and the school will not prove a success.

We have not made any changes in text books this year, supplying the schools only with what appeared to be needed, trusting somewhat to the orders of the teachers whose wants are often unlike for the work they do.

The school house in No. 2 has been shingled and the one in No. 9 has been shingled one side and other needed repairs made.
